

MEASUREMENT CONTROLS, INC.

IndexReader

Proof...Precision...Performance

Measurement Controls, Inc. invented, designed, developed, and started using the IndexReader. The IndexReader sees a circle type index for each gauge and converts each needle's position into digit. The IndexReader takes the guesswork out of a human and helps avoid costly mistakes in index reading. It helps improve customer satisfaction and avoid unnecessary trips to the installation site. It can be used in-shop or out in the field. The IndexReader is currently patent pending with the US Patent and Trademark Office.
